Free weekly activities during the summer in Town Gardens, Queens Park and GWR Park – Park Yoga and Band Concerts

Welcome to South Swindon

South Swindon is a predominantly urban area situated to the south of the main Bristol to London railway line with a population of around 65,000.

South Swindon has a very diverse community with 10 Lower Layer Super Output Areas (mini communities used by government to measure deprivation, education attainment, housing, etc) that are in the 20% most deprived areas in the country.

South Swindon Parish Council is responsible for the ground's maintenance and street cleaning operations within public open spaces, roadside verges, and pavements. In addition, the Parish Council look after 22 play areas and manage 14 allotment sites with 576 plots.

The history of South Swindon features strongly in the South Swindon Green Trail, an 8-mile circular trail running around the parish boundary and linking up the 3 main green corridors running across South Swindon.

South Swindon in Bloom

South Swindon Parish Council first entered the Pennant Class of the South-West in Bloom competition in 2019 and was awarded a Silver Medal as well as the City of Bath Trophy for Best Victorian Park. There was no competition in 2020 due to COVID-19 restrictions and in 2021, we again achieved a Silver Medal with a Silver Gilt Medal in 2022. Each year, we have tried to take on the feedback from the Judges to improve our entry.

In 2023, we entered the main competition for the first time and achieved a Gold Medal and were also awarded the Tesco Cup. In 2023, the community of South Swindon entered 17 sites in the Its Your Neighbourhood competition with 4 sites achieving Level 5 (Outstanding) and 7 sites achieving Level 4 (Thriving).

This year, our volunteers and community organisations have entered 24 IYN sites, the highest ever, showing the energy, dedication, and support from our local community.

In recent years, South Swindon in Bloom has developed a more collaborative partnership with local community groups, organisations, businesses, and volunteers as well as local Councils and National Agencies.

In October, volunteers and stakeholders who contributed to the South Swindon in Bloom project gathered to celebrate all their efforts after their fantastic gold award in the Southwest in Bloom competition. They were presented their Certificates of Thanks and the Its Your Neighbourhood awards.

In January, a new South Swindon in Bloom Steering Group was established with representative bloom community partners to help co-ordinate and increase participation with the main objectives of:

- Increase volunteering, especially from ethnic minorities and young people across all Bloom sites.
- Improve communication and awareness of Bloom projects across all our communities – social media, new web page, posters, fliers etc.
- Fund raising.
- Organise events and promotional activities.
- Provide training including workshop sessions.

New for 2024

- South Swindon in Bloom website launched.
- New Amberol planters installed outside Queen Victoria House, Old Town.
- Community use of part of the Polytunnel in Town Gardens.
- Events to celebrate the 130th anniversary of the opening of the Town Gardens in 1894 and the 180th anniversary of the GWR Park as well as the Blossom Festival.
- Promotion of South Swindon in Bloom at the Blossom Festival, Swindon Growers Summit, Old Town Festival, and the Eco-Fest Event.
- School Art Competition - Badbury Park Primary School Gardening Club.
- Accessible Community 'Grow Your Own Plants' propagation workshop in public spaces.
- Queens Park
 - Refurbishment of the Mesothelioma Garden.
 - Continued refurbishment of the entrance gates.
 - New notice board and information board about birdlife in the park.
 - New planting around the terrace and resolve drainage issues around the terrace pond.

- Town Gardens
 - Visitor Survey to be undertaken during the year to help formulate a new Management Plan for a Green Flag entry in 2025.
 - Aviary refurbishment and identification board.
 - New Tree & Shrub planting.
- GWR Park
 - Planting of the new formal gardens with shrubs and perennials
 - Installation of heritage railway wheels
 - Additional seating
 - New heritage interpretation boards
 - Sub-station Mural
- Welcome to our new partners:
 - Prospect Hospice Gardens
 - TWIGS Community Gardens
 - Westcott Rec Community Forest Garden & Tree Nursery
 - Angel Ridge Community Garden
 - Manor Road Community Garden
 - Artsite Community Beds and Mural Trail
 - Swindon Growers
 - Swindon Allotment & Leisure Garden Association

Financial Review

Bloom Group	Amount	Received from
South Swindon in Bloom	£4,000	South Swindon Parish Council (*)
Blossom Festival	£5,000	National Trust
Blossom Festival	£1,000	Nationwide Building Society
Queens Park Theatre in the Park	£1,500	Nationwide Building Society
Old Town Community Gardeners	£250	Front Garden Group
Old Town Community Gardeners	£100	Billboard Company – Station Approach
Old Town Community Gardeners	£745	Plant Sales & Open Gardens Day
Growing South Swindon Community	£2,700	Rotary Ball
Westcott Forest Garden & Tree Nursery	£1,000	RWE Civil Engineering
Westcott Forest Garden & Tree Nursery	£6,000	Starbucks Corporate Grant
The Gap Community Garden	£1,500	Waitrose
Front Garden Competition	£ 450	Vouchers for prizes - Town Gardens Cafe & two local Garden Centres
GWR Refurbishment	£85,000	Historic England
Manor Road Community Garden	£1,200	Stonewater Housing Association
GWR Park	£1,000	Scottish & Southern Electricity
Kent Road Community Planter	£1,000	Hilliers Funeral Service

(*) South Swindon Parish Council also provide a significant amount of support from their Councillors, the Office team as well as the Grounds Maintenance and Street Cleaning teams, for which we are extremely grateful.

Horticultural Achievements

South Swindon Parish Council are responsible for the management and maintenance of 3 formal parks each one with different characteristics and seasonal interests. Town Gardens and Queens Park are included in the “Register of Parks and Gardens of Special Historic Interest in England”.

Town Gardens is a traditional Victorian style park that remains at the very heart of the local community of Old Town and has a rich combination of historical and cultural heritage along with traditional landscape features.

Highlights include spectacular spring blossom displays from magnolias and cherries as well as formal spring and summer bedding, a rose garden, a spring meadow, public art, a recently refurbished aviary, a frequently used bandstand, and concert bowl for various vibrant cultural activities. In 2024, the gardens will be celebrating their 130th anniversary.

towngardens-swindon.co.uk

Queens Park was created during the 1950's and now provides a green oasis of tranquillity amongst the hustle and bustle of the town centre. The design and features of the park reflect the informality of that period.

Highlights include a comprehensive collection of trees and shrubs, mixed borders, a paeony bed, a community garden, lakes, a rose garden, and formal bedding as well as a performance space.

GWR Park was established in the 1840's initially as a cricket pitch for GWR employees and then as a formal park in the 1870's when formal beds and glasshouses were laid out.

Since that time the park has played a key role in the sporting and social life of Swindon, hosting many social events such as the annual Children's Fete which would attract crowds of over 30,000 people.

In October 2021, a Conservation Management Plan (CMP) for the GWR Park was produced in a partnership between the Parish Council, Swindon Borough Council and Historic England.

In June this year, the GWR Park reaches its 180th anniversary, making it the oldest purpose-built park in Swindon.

In April 2023, GWR Park Blossom Circle was officially opened with local Councillors and staff from the National Trust, Historic England, and Swindon Brough Council.

GWR Park - 180 years old and still looking good.

Blossom trees along Exeter St looking towards GWR Park

Town Gardens Cherry Blossom – voted the best in the UK and featured on BBC & ITV West, local media, social media and on Great British Gardens.

Environmental Achievements

Wildflowers @ Pipers Way

Thriving Meadow @ Croft Wood

Cow Parsley @ GWR Park

Rewilding

The Parish Council, along with suggestions from local residents, have identified a number of roadside verges and other areas that have the potential to develop into wildflower areas. These areas have been taken out of routine maintenance and managed for biodiversity with an annual grass cut and removal regime carried out in late summer.

In addition, there are many roadside verges across the Parish which are planted up with naturalised crocus, daffodils as well as wooded areas with snowdrops and bluebells. These areas provide a splash of early spring colour, popular with local residents and pollinating insects. After the naturalised bulbs have finished flowering, many of these areas are followed by cow parsley, buttercups and other wildflowers including 3 species of orchids adding to the season of interest.

Rewilding sites are identified with a timber post along with a Bee logo to acknowledge that the area is being pro-actively managed and maintained for biodiversity.

Pro-active Management Marker Post

Stages of rewilding management – seed sowing, cut & clearance at Shaftesbury Lake

Biodiversity

South Swindon is rich in biodiversity and contains a number of Sites of Special Scientific Interest (SSSI) including geological SSSI's dating back to the Jurassic period, Local Nature Reserves (LNR's), Scheduled Ancient Monuments (SAM's), and County Wildlife Sites. The more notable designations include Coate Water Country Park, The Quarries, Old Town Cycle Path, Rushey Platt, Radnor St Cemetery and Great Copse. We work closely with the Wiltshire Wildlife Trust who provide specialist advice to ensure biodiversity is encouraged.

Knowledgeable and qualified volunteer Ecologists are helping us to survey and monitor the rewilding areas to record the number of orchids that are flowering and a general ecological survey annually to determine how these areas are developing over time by recording the number of orchids that flower.

A local Entomologist, Marc Taylor M.Sc. has recorded the beneficial impact plantings has had on biodiversity. Marc says, *"As my recording efforts have demonstrated, the corridor from the Town Centre, through Theatre Square and on up to Mr Cod Community Garden all have bee species living, feeding and breeding in them"*.

Bird & Bug Boxes

Our dedicated volunteers construct and maintain numerous bird nesting boxes, augmented this year by a giant bug hotel made by the local community at Cambria Bridge and a new Bug Hotel in Town Gardens that was constructed by children as part of the Blossom Festival.

Manor Road Community Growing Project is a new initiative started in 2024 to transform a green space between Newburn Crescent and Manor Road from an overgrown and underused area into a community focussed, safe and secure place for growing and learning.

The site will be used as a community space for residents including those in nearby flats and sheltered housing as well as for children, staff, and families from the adjacent Robert Le Kyng Primary School. It is anticipated that the space would be a place for the local community to come together to share and learn new skills around food, biodiversity, growing and nature.

The initial phase will involve extensive clearance and restoration of the site to create a positive asset for the community. The project is a partnership between Growing South Swindon, Swindon Growers, Swindon Borough Council and South Swindon Parish Council.

Swindon Growers is a group set up to promote and connect Swindon's many gardening, growing and allotment groups and is for likeminded gardeners or those who want to learn. They share gardening related news, gardening related events or offer help and support to each other.

In April, the second annual Swindon Growers Summit took place in the Town Centre with expert speakers, Q&A sessions, stalls, and a seed swap. The keynote speaker was Ben Raskin, Head of Horticulture and Agroforestry at the Soil Association.

In September 2023, Swindon Growers and Swindon Borough Council's Live Well Team attended events held in the Town Centre, The Parks Library and Mountford Manor School to share food that across Swindon in celebration of the Big Crop Drop Week.

Swindon's Big Crop Drop scheme is a pilot project that co-ordinates the redistribution of fruit and veg from allotments, local market gardeners and community growers to various organisations in Swindon. The scheme aims to reduce local food waste, inspire people to grow their own and highlight local resources and nutritional facts. There was a huge amount of fruit and veg donated and it all went – no matter what shape, colour, and size!

Throughout April, as part of Plant and Share month, the Borough Council organised a series of 'Planting in Libraries' events for families to plant sunflower seeds and cress. Those who attended also received packets of wildflower seeds to take home to encourage pollinators. like bees and butterflies.

Our first Grow your own garden plants workshop was a great success. Lara Howlett emailed *"Thanks for making everything feel so accessible and that we could just go home and get on with growing armed with some new knowledge and didn't have to buy new tools to get started. You have inspired us to start growing this summer"*.

Westcott Community Tree Nursery and Forest Garden is an exciting new project with the Wiltshire Wildlife Trust who also produced the implementation plan.

It aims to collect and grow, locally sourced seed, nuts, berries and cuttings from tree and shrub species, that can be used to supplement tree planting schemes in and around the Borough.

Alongside the production of local trees, the area also provides opportunities to demonstrate and provide other tree-based habitats as well as a “Fedge” (a woven willow living hedge), with beds containing varieties of willow that provide materials for basket making, hazel coppice for bean poles etc., an orchard, seasonal fruits, berries, and perennial food.

As the tree nursery develops it will provide a safe and secure place for people of all abilities to be involved and gain new skills, knowledge and meet with others especially similar community allotmenters nearby.

Progress so far has included site clearance, installing sleeper raised beds, planting 20+ varieties of willow, hazel trees for coppice and some fruit trees.

A grant of £6,000 from Starbucks will enable us to build a base for volunteers and tool storage.

Trees for Climate

In March 2024, approx. 1,000 native tree whips were planted by 25 volunteers at Westcott Recreation Ground under the Trees for Climate scheme in partnership with the Wiltshire Wildlife Trust (WWT) and the Great Western Community Forest (GWCF) to create a Pocket Woodland.

Further projects are currently being planned with the WWT & GWCF over the next few years subject to public consultation.

Sustainability

Belle View and Broome Manor Lane islands are located adjacent to some of the busiest roads in Swindon. Both areas used to be planted up with seasonal bedding plants, but the Parish Council decided a more sustainable approach was required and replanted the beds with low maintenance and sustainable plants.

Broome Manor Island

Coate Water Country Park Garden of Reflection has been planted with a wildflower area for pollinators, and a lavender bank along with seating and views across the lake.

It was created as a place for visitors to reflect and to help with people's wellbeing as well as a place with an educational purpose to help teach young people about nature who may not be lucky to visit the countryside.

Belle View Island

Composting

We have introduced leaf mould and composting areas at Town Gardens and Queens Park as well as local Bloom projects at Cambria Bridge and Pipers Way. We hope to introduce more local composting initiatives in the future. The Parish Council has also invested in a new chipper to allow us to process woody waste material.

Use of Peat

All the bedding plants that we buy are grown using peat-free compost and wherever possible, when we buy plants from local garden centres or nurseries, we try to source plants grown in either peat free or peat reduced compost.

Our bedding plant supplier collects the used plant cell trays which are then sent off to be recycled and re-used as new trays and pots.

We also use soil improver compost from a local waste company made from 100% green waste as well as our own leaf mould collected from the Town Gardens.

Use of Glyphosate

The use of glyphosate has been prohibited by the Parish Council for a number of years and therefore strimming has become more important for controlling, as appropriate, the grass growth around obstructions and margins of roadside verges and open spaces.

Water Harvesting

Water storage containers have been installed to collect rainwater from the roof of buildings in Town Gardens and Queens Park as well as water butts in a number of our community gardens. We plan to increase the number of water storage containers wherever practicable.

Recycling

There are several segregated waste bins provided in Town Gardens and Queens Park where visitors are encouraged to recycle their rubbish in addition to the general waste bins.

Community Achievements

Volunteers and local community groups meet regularly to carry out routine maintenance visits necessary to keep all our schemes looking good throughout the year.

The Old Town Community Gardeners meet every Monday afternoon to maintain the increasing number of sites around the Old Town area and also help to support local residents who perhaps have limited knowledge of gardening but wish to become involved in maintaining their “local patch”.

Cambria Bridge Community Gardeners meet every fortnight to develop the area along the old Canal path and around the Play Park, transforming the area into an attractive, nature friendly, interactive outside space. Everyone is welcome to come along to help and its proving to be a wonderful way to talk with passers-by about the benefits of community involvement.

Volunteers from the Nepalese Association of Wiltshire carry out monthly litter picks at various locations around the eastern side of the Parish.

We also facilitate and support local residents, organisations, schools, and businesses to volunteer on projects in their local community.

Volunteer litter pickers from the Nepalese community

Community litter pick

DoE students clearing leaves in the Town Gardens

Old Town Community Gardeners were formed 10 years ago to help improve the local environment through litter picking and gardening. Since then, the group has become a familiar sight around the Old Town area working on various sites and also advising new groups.

The group maintain the following community gardens and planters:

- The Marriott Beds & Tree Walk (IYN)
- Dewell Mews (IYN)
- Newport Street Planters (IYN)
- Station Approach & Planters (IYN)
- Arts Centre & Library
- Apsley House (IYN)
- Mr Cod @ Prospect Place (IYN)
- Fishing for the Moon (IYN)
- Hesketh Crescent Beds
- Queen Victoria House Planters
- The Hop Inn

Old Town Gardens Plant Sale raised £700 of Charity

Marriott Bed in Winter

Mill Lane Community Garden (IYN) was constructed early in 2022 by a group of keen local residents and has seen an increased sense of community locally. The session to extend the bed saw participants ranging from 8 years old to 80.

As the bed is at the junction of two steep hills, people are using it as a stopping and resting and chatting point on dog walks and runs.

The bed is used for growing a range of herbs, vegetables and companion flowers and perennial plants.

The garden has proved very popular with local residents and a further expansion is planned.

Cambria Bridge Community Beds and Bean Patch (IYN) are looked after by the Growing South Swindon Community Group. The area includes a popular and productive raised bed growing beans and courgettes along with some herbs and companion planting, a small soft fruit garden, a raised bed planted with a range of perennial plants, a number of compost/leaf bins, hedges, a rewilding strip, and a mud kitchen.

The environment here is harsh for growing plants – the low level raised beds are placed on top of tarmac. In addition, the beds surround a children's playground, kickabout area and wheels park so again this adds to the challenges. A new netting barrier has recently been installed to try to prevent stray balls from the kickabout area from damaging the planting.

Despite these difficulties, the beds are popular with the local community providing fresh produce and an attractive area to sit and relax just a few hundred metres from the very centre of Swindon.

The Friends of Shaftesbury Lake (IYN) is an established group of local residents who are passionate about the lake and the surrounding area located in Park South. The group have worked with the Parish Council to put on a Wildlife Discovery Day at the lake in April as part of the annual Blossom Festival with activities including Pond Dipping, a Discovery Trail, Face Painting, build a Bug Hotel and learning about wild flora and fauna with the Wiltshire Wildlife Trust.

Shaftesbury Lake Wildlife Discovery Day

The Gap Community Garden (IYN) is another project started in 2022 in Park South, so named as the garden is hidden away and can only be accessed through a “gap” between two blocks of houses. The garden was set up to encourage community involvement and help provide free food.

The Great Western Wellbeing Memorial Garden is a new initiative by the Brighter Futures Charity in memory of the 300+ lives lost at the Great Western Hospitals NHS Foundation Trust due to COVID. The garden with 8 different zones is located adjacent to a pond at the entrance of the hospital and is planted with modern perennial planting, colourful borders, trees, and seating.

Christ Church Rose Garden has been the final resting place for the ashes of more than 1,300 local people. Although it is now closed to new interments, it remains a centre for remembrance and consolation for many families. Many of the departed are remembered by small plaques but many more are unmarked, and it remains a key part to the local community.

The Revd Canon Simon Stevenette says “The garden is a place of peace and remembrance for the many visitors to our site and we are acutely aware of our privilege and responsibility for looking after it. Over the past year, a team of dedicated volunteers have been working to restore the first part of the garden to a more accessible, manageable, respectful, and dignified, final resting place.” Most of the church grounds are now managed for wildflowers and biodiversity.

Radnor Street Cemetery was designated as a Local Nature Reserve in 2003 and started to manage the site for biodiversity. The Friends of Radnor Street Cemetery heritage group were formed to tell the important story of the cemetery through the people who are buried there. Burials include civic dignitaries, members of the Great Western Railway hierarchy, the boilermakers and plate layers, the philanthropic benefactors and trailblazing women, the teachers, and tradespeople and the 104 servicemen who lost their lives because of their military service in two world wars. The small team of dedicated volunteers research and write about those buried in the cemetery, conduct guided cemetery walks, help maintain the Commonwealth War Graves, help visitors locate family graves, hold exhibitions in the Chapel and have an annual Remembrance Day Service.

Richard Jefferies Museum (IYN)

The Museum Trust was founded to develop and manage the museum which honours Richard Jefferies, a well-known Victorian writer, and a pioneer on environmental issues and one of the first people to use the term “wildlife”.

The museum contains a 17th century thatched cottage, a 19th century three-storey farmhouse, outbuildings, gardens, a small copse, an orchard, and vegetable gardens. The Richard Jefferies Trust has introduced a programme of arts, music, and nature events, including activities for young children and has a small museum café.

In 2023, the Museum was judged to be Outstanding (Level 5) in the Its Your Neighbourhood competition.

TWIGS Community Gardens (IYN)

The beautiful themed gardens are green sanctuaries in the middle of Swindon, where each distinctive space can be explored and visitors can connect with nature and each other. The gardens are places of healing and engaging with nature through horticultural therapy is a powerful way of reducing stress and finding a sense of purpose. The gardens are also a resource to give people who experience mental health problems the chance to regain confidence, self-esteem and to learn new skills.

The gardens have evolved over 25 years thanks to the hard work and dedication of our band of staff and volunteers, and through this collective effort we have managed to nurture an oasis of calm and beauty in the middle of a bustling town.

The gardens are open to the public every Monday, Wednesday and Friday between 10am and 3.30pm. Plants and products are also available to buy and a number of public events are held throughout the year.

The adjacent Olive Tree Café also provides opportunities for people who need support with their mental health. Please visit our website at [TWIGS Community Gardens - Swindon | The Recovery Tree Charity](https://www.twigscommunitygardens.co.uk/)

Illustrative Map of the TWIGS Garden

Rainbow Garden in Spring

Prospect Hospice (IYN) was founded in 1980 for the local community and with the local community's support. This site was opened in 1995 and has been supported by volunteers ever since. The volunteer gardeners play a huge part ensuring our gardens are maintained and looking beautiful for the enjoyment of our patients, their families, visitors, and the local community. There are 12 regular volunteers led by Lead Volunteer, Yvonne, who tend to the gardens every week come rain or shine.

Once a year we share the gardens with the local community at our summer fete. The Remembrance Garden is open every day for families and friends, providing a peaceful area to create a lasting memory of loved ones whilst strolling around the bluebell path or to take a moment at the memory tree.

The volunteers make the decisions around the maintenance of the gardens and planning what needs to be done. They have been busy clearing woodland areas of dead and overgrown shrubs and reinstating hedges and fences around the borders. They care about how the gardens are maintained, making, and using their own compost totally peat free, and thinking now about how we can integrate a wormery to further reduce food waste and add nutrients back into the ground. Water butts are scattered throughout the gardens and used to water all the planters.

The gardens bring a great deal of enjoyment to the patients, and a tranquillity which is really appreciated. The volunteers ensure that the patients patio areas are always at their best and encouraging the local wildlife to come out and say hello. Robin, a family member said; *'Our time spent at the hospice has left us with some very special memories. My mother absolutely adored nature and loved being outdoors. Her room looked out onto the stunning gardens that were teeming with wildlife. We'd sit at my mother's bedside with the patio doors open and watch extraordinary things. The bird feeders were awash with birds; we saw woodpeckers, goldfinches, and blue tits feed along with pheasants and even watched as muntjac deer grazed just 15 feet away from us. Nature gathered outside the windows, and, for my outdoorsy mother, it felt almost magical and was incredibly comforting.'*

Central Community Gardening (IYN) is a project managed by the Mechanics' Institution Trust and supported by the LiveWell team at Swindon Borough Council, Central Area Resident Improvement Group, the Harbour Project, and South Swindon in Bloom. A variety of outdoor activities take place across several locations, including the Central Community Centre and Westcott Allotment.

The project aims to provide inclusive gardening activities that bring people together and promote sustainability and horticulture. Two volunteer-led groups regularly participate in the gardening activities organised by the Mechanics' Institution Trust and the LiveWell team. These groups are the Global Gardeners and Mechanics' Maintenance Team.

The Mechanics' Maintenance Team participates in gardening as well as other activities such as painting and litter picking around the Railway Village to help keep the area clean and tidy.

The Global Gardeners mostly focus on the Community Allotment and Central Community Garden. The project is funded by the Wiltshire Community Foundation.

The Front Garden Competition which is open to all residents living in the South Swindon Parish area to enter a picture of their front garden, container, window box or hanging basket. Here are some of the 2023 winning front gardens.

Every Cloud (IYN) is a charity run by volunteers offering a variety of activities, and events which support the mental health and well-being of all in the community through various Arts & Crafts, the natural world, and gardening.

The Farmhouse Garden is planted in a cottage garden style with many herbaceous perennials along with some herbs, vegetable, and a raised pond.

Next to the garden there is a Community Orchard containing many historic fruit varieties as well as a sculpture garden.

The restored barn is the base for various activities and events run by Every Cloud and is set within the natural environment of Stanton Park and Local Nature Reserve.

In 2023, the garden was judged to be Outstanding (Level 5) in the Its Your Neighbourhood competition.

Cultural Activities

The parks and green spaces of South Swindon are home to many arts and cultural activities throughout the year including public art, exhibitions, sculptures, and memorials. Some of these are shown in the photo gallery below, others will be included on the tour. Details about the Bandstand concerts, Music in the Park, Theatre in the Park, and other events taking place can be found on the Parish Councils web page.

Swindon Paint Fest (Sept 2023) was back again for its 2nd year. Organised by Artsite, the festival aims to turn the town into a creativity hub of all kinds with over 50 talented artists taking part to create large scale murals, live painting, art market, exhibitions, workshops, dance, and music. The Mural Trail will take you to places at a variety of locations in and around the Town Centre and Old Town to see the eye-catching and thought-provoking artworks some of which can be see below.

Our Partners & Supporters

South Swindon in Bloom would like to thank our partners for their continued participation and support:

- Angel Ridge Community Gardeners
- Arkell's Brewery
- Artsite & Post Modern
- Badbury Park Primary School
- Brighter Futures Charity
- Cambria Bridge Community Gardeners
